UMBRELLA RIG

The Jerky J School rig allows fisherman to catch more bass. When bass school offshore, they often form in groups of hundreds of fish. Being the opportunistic predators they are, bass will attack schools of minnows and the Jerky J School rig looks just like a school of minnows. Cast the Jerky J School rig, count it down to the correct depth and hang on! During testing it was very common to catch multiple bass on one cast. Superior all-metal tin construction with stainless steel wire and premium swivel and snaps.
